

# ASSEMBLY INSTRUCTIONS

## SharkCrates WITH LOADING PANEL (WITH SCREWS)

1

Use the following reference as your guide:

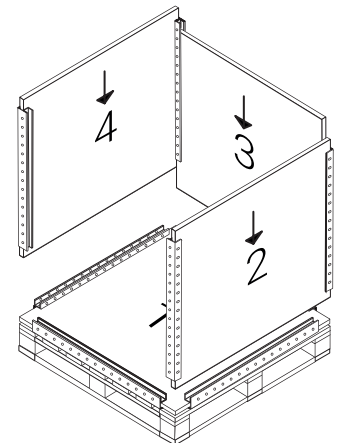

- Panel 1 – Bottom (with 4 brackets)
- Panels 2 & 4 – Ends (with 2 brackets each)
- Panel 3 – Side (no brackets)
- Panel 5a – Side (bottom loading panel)
- Panel 5b – Side (top loading panel with bracket)
- Panel 6 – Top (with 4 brackets)

Please note!  
There are no numbers on the actual panels

2

One at a time, place panels 2, 3, and 4 into the brackets on panel 1 and the adjoining corner brackets, ensuring that panels are square and fully inserted into the brackets.

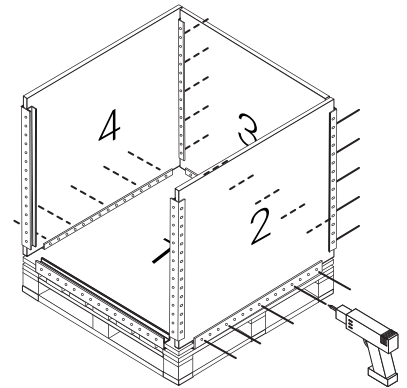

# ASSEMBLY INSTRUCTIONS

SharkCrates WITH LOADING PANEL (WITH SCREWS)

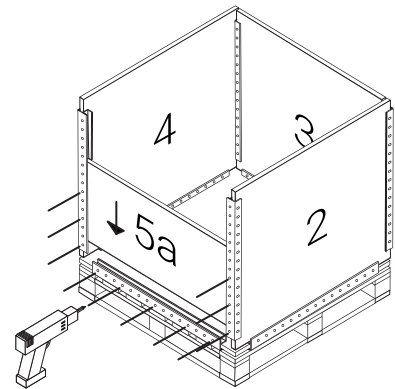

3

Using the cordless drill and the supplied screws, secure panels 2, 3 and 4 from the outside of the crate, placing screws in the circular holes at approximately 9.5" / 240mm intervals.

4

Slide panel 5a down the brackets on panels 2 and 4. Using the spacing recommendations above, secure panel 5a to panels 1, 2, and 4.

5

Slide panel 5b on top of panel 5a and enclose crate using panel 6. Based on requirements, secure panel 6 to panels 2, 3, 4, and 5b with screws, t-nails, or metal banding.
